DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: Species 1 shown in Figures 4A and 4B, Species 2 shown in Figure 4C, Species 3 shown in Figure 8A, Species 4 shown in Figure 8B, and Species 5 shown in Figure 8C.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-8, 11-13, 15-28, and 31-45 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 3751

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Cjaza on 9/29/04 a provisional election was made without traverse to prosecute the invention of Species 2, claims 1-9, 11-29, 31-46, 48, and 49. Affirmation of this election must be made by applicant in replying to this Office action. Claims 10, 30, and 47 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 11-29, 31, 33, 34, 38-46, 48, and 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Byrd.

The Byrd reference discloses a container filling system comprising a container loading station 38, a container filling station 40, a drive system/transport device comprising a carrier plate 76, a drive mechanism 92, a mounting piece 80, a shoulder 84, and a covering station 42. Regarding claims 38 and 39, elements 52 and 98 could also be construed as a carrier plates.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 32 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byrd.

The Byrd reference discloses a system as discussed supra, but remains silent as to the height of the base and shoulder. However, it would have been obvious to employ a base and shoulder having heights in the claimed ranges in the Byrd system, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 2336.

Allowable Subject Matter

Claims 36 and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

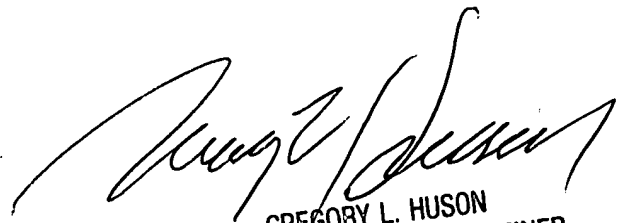

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Zopf reference discloses a similar system.
